

Dec. 2023

**Table 1. – EPA Accepted Local Limits at Maximum Allowable Industrial Loading**

| <b>Pollutant</b>            | <b>MAIL<br/>(lbs/d)</b> | <b>Basis of Limitation</b> |
|-----------------------------|-------------------------|----------------------------|
| Arsenic                     | 1.09                    | Water Quality              |
| Cadmium                     | 0.23                    | Water Quality              |
| Chromium                    | 11.42                   | Inhibition                 |
| Copper                      | 15.58                   | Water Quality              |
| Lead                        | 2.21                    | Water Quality              |
| Mercury                     | 0.0024                  | Water Quality              |
| Nickel                      | 8.22                    | Water Quality              |
| Silver                      | 2.32                    | Water Quality              |
| Zinc                        | 20.64                   | Water Quality              |
| Bis(2-ethylhexyl) phthalate | 0.65                    | Water Quality              |
| Methylene Chloride          | 4.70                    | Water Quality              |
| Phenolics, Total            | 18.66                   | Water Quality              |
