

HATFIELD TOWNSHIP

RESIDENTIAL USE & OCCUPANCY PERMIT PROCEDURES

A Use & Occupancy permit is required for all new construction, resales and title changes.

PART I – Location of Property – Complete address including city, state and zip code must be provided on all applications.

PARTS II thru X – Complete every section.

PART XI – Sign and date application required. If the Applicant is not the owner of the property, an owner statement indicating approval of the proposed construction must be submitted with the application. Provide phone numbers where property owner/resident and or Applicant may be reached on the day of the inspection.

SPECIFICATIONS

- Permits can only be inspected within 30 days prior to closing.
- Representative (18 years of age or older) must be present at the time of inspection.
- **Please pay special attention to items required on the attached CHECKLIST, specifically smoke detectors. They are required in every bedroom, in addition to each level, including the basement.**
- **Residential Automatic Fire Sprinkler Systems attach approved Inspection Report if so equipped/applicable (see attached).**
- **Complete signed HTMA Sewer Connection Sheet and Sanitary Sewer Lateral CCTV Video Inspection Report by Hatfield Township Municipal Authority (see attached).**
- For on-site septic systems, attach a certified inspection report within 2 years of application date.
- An additional fee will be imposed if a reinspection is necessary.

ADDITIONAL INFORMATION

FEES – Permit fees must be submitted with the permit application. If paying by check, please make check payable to “Hatfield Township”.

INSPECTIONS – Call the Township building department office (215-855-0900) at least 24 hours in advance to schedule an inspection. Responsibility for scheduling an inspection lies with the owner or applicant. **If the appropriate inspections are not requested, an uninspected Use & Occupancy will not be approved. A U&O will also not be issued without HTMA’s prior approvals.**

HTMA MEMO: Lateral Inspection Camera Instructions

After receiving the first presale lateral inspection video it is apparent that specific instructions for video procedure is necessary. It is up to the contractor to read the instructions carefully and ask for clarification if needed. It is the contractor's responsibility to inspect the video in order to be compliant with HTMA's instructions. If the contractor does not follow protocol, it will be the responsibility of contractor to redo the inspection video – not the homeowner. Guidelines for how the video inspection are to be performed are as follows:

1. The camera equipment used shall be one specifically designed and constructed for such inspections. Equipment capable of adding notes or observations is preferred.
2. Lighting shall be sufficient to provide clear illumination of the entire perimeter of the pipe for several feet ahead.
3. The video shall show the area around the point of entry in order to confirm the location as well as a clear image of the cleanout or the sewer main at the end of the survey.
4. The camera shall be pushed or pulled in as nearly continuous a motion as practicable, without skipping any portions of pipe and no greater than **30 feet per minute**. It shall be stopped to observe features such as joints, defects, branch connections or irregularities of any kind and shall be slowly advanced back and forth as needed to provide as full a view of the feature as possible.
5. Digital recordings submitted to the Authority must be in MP4 format, legibly labeled with the time, date, and address of the recorded session accompanied by the Sanitary Sewer Lateral Inspection Report.

Note: ORD # 696, 244-49 (7) Permits video inspection oversight by the Township or Authority.

Failure to follow these instruction may and will be cause for video failure. Any questions, please call our office during normal business hours at 215-822-9300.

Mike Lightner
HTMA Inspector
